Includes unlimited spyware detection and 1 year renewable spyware removal.

GET PROTECTION *PLUS* INSURANCE FOR A COMPREHENSIVE SECURITY SOLUTION

PCdefense offers protection against spyware, crimeware, malware, rootkits, viruses and other stealth applications by disabling them before they begin transmitting your personal data to cyber criminals.

PCdefense goes beyond other security applications by offering you protection in the event of catastrophic software or hardware failure - or even if your PC is dropped or stolen! With PCdefense, your files, settings, and programs can be kept safe and reloaded onto your PC once it's been cleaned and repaired, or even loaded onto a brand new PC if need be. It's the ultimate insurance against any catastrophic event.

PROTECT YOURSELF:

SpyAlarm™ blocks spyware before it can begin transmitting your personal information to online criminals.

Spyware Scan removes the spyware that's compromising your privacy right now.

Keylogger Prevention stops malicious keyloggers from invading your privacy and stealing your identity.

Rootkit Scan identifies hidden files and processes that are undetectable by conventional security programs and even by Windows.

Virus Scan delivers on-demand, web-based scanning tools that are constantly updated, protecting you against the latest virus threats.

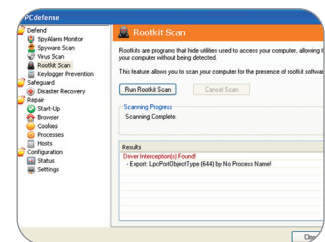

Advanced Repair Tools allow system administrators and advanced users to monitor and manage the start-up manager, browser settings, processes, host files, and status reports from one convenient screen.

INSURE YOUR PC

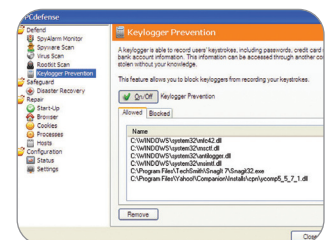

Disaster Recovery offers you protection in the event of catastrophic software or hardware failure - or even if your PC is dropped or stolen! With PCdefense Disaster Recovery, your files, settings, and programs can be kept safe and reloaded onto your PC once it's been cleaned and repaired, or onto a brand new PC if need be. It's the ultimate insurance against any catastrophic event.

“If you’re banking or shopping online, the weakest security link isn’t the bank or the online store... it’s your own PC.”

When Internet thieves steal passwords, credit card numbers, and other sensitive information, it’s rarely because the bank or the online store has inadequate security. It’s because of crimeware that’s right on the user’s PC. Don’t let Internet crime happen to you. Protect yourself with PCdefense.

THE SPYWARE THREAT

Did you know it takes an average of 20 minutes for spyware and viruses to find and infect an unprotected PC? It’s no wonder almost 90% of all PCs are currently infected. Protect your PC from these online threats with PCdefense.

KEYLOGGERS

1/3 of online identity theft can be traced to more than 6,000 known types of keyloggers. Stop keyloggers from recording your keystrokes and stealing your passwords and sensitive information. Stop both known and unknown keyloggers with PCdefense!

IDENTITY THEFT

1 in 8 PC users in the USA have been affected by Internet identity theft, and each victim loses an average of \$4,000 per incident. Identity theft is on the rise due to activities of sophisticated Internet crime rings. Fight back with PCdefense!

ROOTKITS

Rootkits are the newest crimewave to hit the Internet. They cloak spyware and viruses, making them invisible even to many leading security products. PCdefense goes where other security suites don’t by identifying rootkits hidden on your PC.
